Hunting for some additional bass for your music player than look no other than Audioengine S8, the powered subwoofer known for its exceptional bass reproductions and mind blowing sound clarity. The unit is recommended to use with variety of audio systems while listening to music, watching movies and playing games. The S8 is a must have accessory that can bolster the performance of any existing sound system.

[Audioengine S8](#) is an 11 inch square shaped box that packs an eight inch super power woofer. It's not only good but also portable enough to carry along at any place. The overall looks and finish is awesome and it's easy to connect the S8 with your existing sound system. If you want to place it away from the main sound unit then you can also do that as the S8 is wireless ready. For best results it's recommended to pair the S8 with Audioengine W1 wireless audio adapter or [Apple's Airport Express](#). The S8 features an auto-sleep power saving mode and supports dual line-level inputs. It comes with all the cables required for connection and power supply.

This subwoofer works with all surround sound receivers, powered [speakers](#), desktops, laptops, notebooks, [Apple](#) universal dock, flat panel televisions, iPods, Internet [radio](#) and even with networked music systems. It is best used to complement speakers like [Audioengine A5](#), as it adds that much needed bass to the overall sound. You can also use S8 to add thump to your gaming. It can be used with all popular video game consoles like [Sony PlayStation 3](#), [Microsoft Xbox 360](#) or Nintendo Wii.
